

Attached is a list of all the prints in the complete package, along with the size and last revision. Keep this as a handy list for what you have.

One thing to keep in mind when working with full-size prints is to always refer to the dimensions on the drawing. It is not proper practice to use a print as a “template”.

Your prints were made from a digital copy of an original set of Stearman factory blueprints from the 1940's. Due to their age and the printing process itself, there will be some size distortion.

Don't forget to come back and visit our website at www.stearmanwings.com. New items are being added on a regular basis such as books, videos, artwork, gift items and apparel.

This is a list of the full-size blueprints in the General Group.
